

Septerna to Participate in the Jefferies Global Healthcare Conference

05.28.24

SOUTH SAN FRANCISCO, Calif. – May 28, 2024 – Septerna, a biotechnology company discovering and advancing novel, oral small molecule medicines targeting G protein-coupled receptors (GPCRs), today announced that management will participate in the Jefferies Global Healthcare Conference in New York on Tuesday, June 4, 2024.

About Septerna

Septerna, Inc. is a biotechnology company focused on advancing novel, oral small molecule medicines targeting the entire class of G protein-coupled receptors (GPCRs). The company's Native Complex Platform™ recapitulates GPCRs with their native structure, function, and dynamics outside of the cellular environment to rapidly apply new technologies for industrial-scale drug discovery to address both validated GPCRs and many GPCRs that have been undruggable and unexploited to date. Septerna is building a pipeline of GPCR-targeted, oral small molecule drug candidates, led by its program targeting the parathyroid hormone 1 receptor (PTH1R) for the treatment of hypoparathyroidism. Septerna was launched in 2022 by scientific founders who have made groundbreaking GPCR discoveries. For more information, please visit www.septerna.com.
